Subject RE: Contaminated dirt to Richardson Flat

No but the wrath would be intolerable. What needs to happen is that the City needs to understand that it is OK to keep some of this stuff on site especially when a large project with landscaping is being developed. They (Jeff) don't like doing that but it is in their best interest to do so. They need to change their mindset on that issue.

We just need to get our (UPCM and EPA) stuff done so we can close the site.

I just want to keep you in the loop on what is going on.

Thanks

Kerry

Do you want to take it?

Sent from my BlackBerry wireless handheld.

Kathy:

Attached are four letters from Park City in PDF format. These letters are from Ron Ivie and request that a certain amount of contaminated dirt from various projects in Park City be accepted into Richardson Flat.

Collectively, the City is requesting that 8,275 yards of material be taken at the Richardson Facility.

The breakdown is as follows:

Park City Parking Garage	-	3,500 cubic yards
Robert Brown ( Prospector )		1,700 cubic yards
Park City Utility Project		2,375 cubic yards
Park City Watts Garage		700 cubic yards

I would appreciate your thoughts on this import.

Thanks

Kerry
